June 16th , 2020

Dear TrainerRoad recruitment team,

I have completed my Associate's Degree in Computer Science and am looking for a job position where I can develop my professional skills while providing value to the corporation.

Even though I am new in the field, I am convinced that I have the capabilities and commitment necessary to join your team and improve quickly in order to provide value to TrainerRoad. I am a fast learner who is passionate about developing tools and solving problems. I enjoy facing and overcoming new challenges every day. I would be truly grateful if you gave me the opportunity to show you what I can accomplish.

I have a particular interest in becoming a member of your team. I consider myself an active and sportive individual. From an early age, I have enjoyed practicing physical activities and bringing my body to its limits. I have participated in several triathlons which I have highly enjoyed, and the cycling-related part is by far the most challenging one. I would like to work for a corporation which allows me to help people continue to challenge themselves physically.

My ultimate goal is to continue studying towards my Bachelor's degree in Computer Science. However, I must work in order to gain experience and support myself financially in the near future. Hence, I would highly appreciate if you took a moment to review my attached resume. I am willing to review offers in full/part-time or intern positions.

Thank you for your time and consideration.
Jefferson Phillips Retana
